"As risk of fire is always there, the system to protect us should be ready when we need it the most..."

Mr. Satish Upadhya
 Director, DFSPL.

We are a group of professionals, en route to build our legacy of a company with the best quality standards.

The safety of life as well as property of end users of our installations is at the heart of our existence. We are striving to be recognized as an organization committed to quality.

To achieve this we have been taking necessary steps to improve quality of workmanship, standards of safety, methods of project management, development of skills amongst our team and all that is necessary to provide the best to our clients.

We are greatly obliged and thankful to all our clients, associates for supporting and encouraging us in our endeavor to be nothing but the best.

About DOUSEFIRE

- [Introduction](#)
- [Mission & vision](#)
- [Milestones](#)
- [Management team](#)
- [Partners](#)
- [Certifications](#)

Ever since our inception way back in 1999, the journey 15 years on has been quite memorable. We have learnt and grown with managing complex tasks and the experienced gathered through the years has brought the best from within in us.

here's looking forward to many more years into service delivery and many more satisfied clients.

Year	Milestone Description
1999	Successfully commissioned clean agent system with addressable fire alarm system for switch rooms of telecommunication rooms of HUGES TELECOM at Vashi / Turbhe.
2002	Successfully commissioned Automatic fire alarm system for conveyors and MVW/HVW spray systems for transformers & cable galleries for power plants of THERMAX, GRASIM CEMENT, JK CEMENT, MARAL OVERSEAS, ULTRA CEMENT at various locations.
2005	Successfully commissioned various systems like wet sprinkler system, gas based suppression system, aspiration system, etc. for 8 lacs sq.ft. within scheduled time lines for TCS at Powai, Mumbai.
2009	Successfully Commissioned Mechanical fire protection and ELV systems for Corporate office building of TCS at Goregaon, Mumbai and commenced work for various corporate offices like AAA Digital, BNY Mellon, BNP Paribas, Barclays Bank, Deutsche Bank, amongst others.
2011	Successfully Commissioned various Life Safety and Server Protection Systems for the first Tier IV Data Centre in India viz. GPX at Chandivili, Mumbai and Commenced work for Vodafone Tier IV Data Centre at Airoli, Navi Mumbai.
2015	Grand Celebration of our 20th Anniversary at THE New Spacious, State of Art Corporate Office. Successfully Commissioned Life Safety and Fire Protection Systems for TCS complex at Mihan, Nagpur; IBMS for UHG Group Corporate House at various locations (Pune, Hyderabad, Gurgaon, Noida) and received orders for Vodafone Pune Data Centre (complete IBMS System); Kochi Metro for Fire Fighting systems for 23 stations at Kochi, Kerala; 7 storeyed Corporate office for ZEE- Essel GROUP at Lower Parel, Mumbai (complete IBMS System).

Why DOUSEFIRE

Introduction

Dousefire Commitment

How reliable can Building Automation and Fire protection systems be?

We feel, as reliable as the company that installs and integrates them. If the system fails in an emergency, it is too late to rectify any mistakes made.

This actually answers the question, Why Douse Fire? Rely on DouseFire.

We assure you that you are putting your trust in one of the leading IBMS and Fire Suppression Companies. M/s DFSPL has around 300 employees, including commissioning engineers, senior engineers, site supervisors, technicians, certified welders and fitters.

This work force is well managed by a battery of Management Staff of various departments like Marketing, Sales, Projects, Design, Procurement, Finance, etc, apart from the top level Management team.

We at DFSPL know that Quality is nothing else but making customers' needs the top priority.

You can be sure of receiving an expert and reliable service from us... from the first time you get in touch with us, to the completion of your project and subsequent service support.

SOLUTIONS Offered

FIRE Suppression

SECURITY Systems

BUILDING Management

INFRASTRUCTURE Setup

Choosing the right fire protection solution is critical to ensuring your facility is appropriately protected. Fike engineers expertly manufacture an extensive selection of products to cover wide range of applications.

DFSPL fire protection systems are effective, easy to use, and safe for people, key assets, facilities and the environment. Whether your needs are industrial, commercial or special hazard applications, we've got you covered.

Fire Detection and Fire Alarm systems

Intelligent Addressable

Intelligent Addressable Systems offer benefits in terms of speed of detection, identification of the location of fire and easier maintenance. Intelligent systems also offer tolerance to faults in the system wiring, which allows a single pair of wires to be used to connect up to 200 devices to the system, allowing cost savings in the wiring of large systems.

Conventional

Conventional Fire Alarm System provides the earliest practicable fire detection and warning. This system consists of smoke or heat detectors at designated locations, to detect smoke or heat at the earliest during any outbreak of fire.

Hybrid

The Hybrid Fire Alarm System combines the capabilities of both Intelligent Addressable and Conventional Fire Alarm System.

HSHD: High sensitivity Smoke detection Systems.

Fire Suppression systems

Water Based Systems

DFSPL offers a range of Water Based Fire Protection Systems like Sprinkler, Hydrant, Pre-action Systems, Kitchen Hood System, High and Medium Velocity Mist Systems and Tank Foam System to suit individual fire protection needs.

Gas Based Systems

In addition to fire detection and alarm systems, organizations that have a dedicated server / rack rooms should have minimum gas suppression systems. The different types of gas suppression systems available are CO₂, NAF SIII, FM 200 and Inergen.

SOLUTIONS Offered

[FIRE Suppression](#)

[SECURITY Systems](#)

[BUILDING Management](#)

[INFRASTRUCTURE Setup](#)

Security is fundamentally important across all walks of life to ensure the overall safety and possessions of all individuals are comprehensively protected.

Throughout commercial properties such as office buildings and retail outlets, all companies require careful consideration of integrated security solutions.

Although security guards provide an element of protection on the ground floor, their eyes and ears are not extensive enough to provide an over watch of the entire premises. This is where cameras within CCTV security systems play a crucial role within the daily running of a business.

CCTV Surveillance System

Integrated security and surveillance platforms that provide support to law and order establishment and city administration. This solution integrates command and control centre modules with strategic surveillance and analytics platforms. Firepro Systems works with leading edge international partners to custom design city and city landmark specific solutions.

Access Control

Access Control System performs 2 primary functions:

- Control of all Entry/Exit points from an Area/Facility
- Tracks and Logs personnel throughout a facility

The Access Control forms a security barrier and hence protects the facilities from unauthorized entries. Every individual working in the facility has unique cards hence trespassing is avoided.

Video Surveillance and Analytics

Video Surveillance Systems form a vital part of any building's surveillance set up, as they help in monitoring the movement of people. The prime application of Video Surveillance Systems is to identify any unauthorized movements and to help avoid any untoward incidents from taking place in the campus.

In order to increase operational and energy efficiency, you are looking for new ways to make managing your facility easier. **Douse Fire** can successfully integrate, install and maintain building management systems and provide life cycle support for facilities like yours, making it easier to increase comfort, safety and security for your occupants.

We offer a scalable range of building management and intelligent building solutions and services — from individual subsystems to fully integrated intelligent buildings — that reduce risk while delivering world class operating and energy efficiency.

Building Management Systems : The unified system normally comprises of:

- Illumination System
- Electric Power Control System
- Heating System
- Ventilation System
- Microclimate System
- Conditioning Devices
- Security and Observation System
- Magnetic Card and Access System
- Fire Alarm System
- Lifts, Elevators and Escalators
- Other Engineering Systems

HSE & Quality

HSE Policy

Safety Policy

Douse Fire firmly believes that Health and Safety of its personnel are of paramount importance.

Management of Health, Safety and Environment is an essential and integral part of business and operational practices, and shall not be compromised under any circumstances.

Accidents and injuries are preventable through continual improvement in working environment and involvement of all employees making thereby a safe, healthy and accident free work place. Everyone has an obligation to stop work that is unsafe.

Our Compliance to

- Comply with requirement of all relevant statutory, regulatory and other provisions.
- Promote health, safety and environment on and off the job by creating awareness on HSE and develop the required level of knowledge and skills in all personnel through need based training and internal communication.
- Advocate the adoption of prudent HSE principles and practices by our Employees and other associates.
- Ensure that appropriate resources are available to implement HSE policy and continuously review the policy's relevance with respect to legal and business development.
- Conduct audits and mock drills on site to that operations are in compliance with HSE management requirements and for emergency preparedness.
- Strive for continual improvement of our performance and measure progress by specific HSE performance indicators.

HSE & Quality

[HSE Policy](#)
[Quality Policy](#)

"I know how much it hurts you in lost time and money when a project drags on and on.... past the deadline. In 20 years in business I have met the deadline every time, I guarantee I'll do whatever it takes to complete the project on time."

Mr. Rakesh Kale
 Director, DFSP.

As a leading system integrator organization, **Douse Fire** believes that delivering quality in everything it does is a personal responsibility of every employee in the organization.

Douse Fire is committed to delivering systems and services that are reliable; within the specified budget, time frame and as per the agreed scope. Each Business Vertical/Regional Business Head is personally responsible for implementing this policy.

Our Promise

- Ensure that all our personnel are trained in Quality Assurance and Quality Control on continual basis at all levels.
- Monitor and ensure the purchase of materials from suppliers who have a proven ability to consistently satisfy the agreed and laid down quality standards and specifications.
- Provide and ensure that the quality control mechanisms are sufficiently and effectively applied at all times on our sub-contractors and other parties involved in our projects.
- Ensure Quality Assurance of our services to both internal and external customers.
- Endeavor to satisfy and meet the needs and expectations of our customers.
- Periodic reviews of the implementation of the quality policy will be done by the Apex Quality Council and Regional Quality Councils. The Policy Statement will be reviewed annually as a part of the management review process, to ensure its continued relevance and adequacy.

MAINTENANCE Services

AMC - Non - Comprehensive

[AMC - Comprehensive](#)

[Value Added Services](#)

AMC - Non - Comprehensive

Douse Fire AMC Engineering team has dedicated pool of engineers to manage and maintain critical systems of Fire, Security and Building Management Systems.

We have 24x7 hours telecalling customer care number to handle critical troubleshooting
 All AMC qualified service engineers have hands on training from all the principal OEM's.
 AMC Service engineers are a part of commissioning team to ensure minimal downtime of the systems.
 Pan India network of service engineers for servicing clients.

Non-comprehensive Annual Maintenance Contract

This is basically a "Services" Contract with a certain percentage Value in rupees. Once the client enters into this AMC, our team of trained engineers' and technicians' will visit the site and carry out Preventive Maintenance Services (PMS) which is ideally done once in 3 months.

This is a proactive services which means that this Services are planned in advance in coordination with the clients and the calendar of our visits are shared for site clearances etc.

Apart from the PMS, even the complaints are attended without an additional cost. However the Spare parts and Consumables are chargeable at prevailing prices.

Engineers will be deployed at your facility to monitor, maintain and manage your systems. This frees up your manpower resources and ensures more efficient systems management. Breakdowns, if any, can be identified and resolved proactively.

This, in turn, enables you to respond faster and more efficiently to emergencies and minimize losses to people and property.

Kindly refer the T&C of Contract for details.
